- Responsive design compatible with desktop, tablet, and mobile devices.
- Intuitive and user-friendly interface.

Technologies: HTML5, Tailwind CSS, JavaScript, React/Vue.js.

Backend Development:

- Robust and scalable server architecture.
- Secure database for storing customer and admin data.

Technologies: Node.js/Express.js, PHP/Laravel/CodeIgniter.

Database Management:

- Relational database for structured data management.

Technologies: MySQL, PostgreSQL, or MongoDB.

Email/SMS Notification System:

- Integration with email services (e.g., SendGrid, PHPMailer) for sending notifications.

PROJECT TIMELINE

The project is estimated to take 4 weeks, with an additional 3 weeks for support.

Week 1: Project Setup and Planning

- Set up the project structure, including pages, routing, and necessary libraries.
- Structure the database and create required models and methods.

Week 2: Front-end Design and Initial Content Population

- Populate the main website with static content.
- Place dummy content where dynamic content will be required.
- Conduct design reviews to ensure alignment with desired layouts.

Week 3-4: Development Phase

- Develop backend (administrator) functionalities.
- Implement dynamic sections of the website.
- Incorporate feedback from design reviews and adjust as necessary.
- Conduct thorough testing of the website for functionality, usability, and performance.
- Address any bugs or issues identified during testing.
- Obtain final approval from client.
- Launch the website on the live server.

COST ESTIMATE

Total Estimated Cost: NGN 600,000
